

Nakajima Mugi

Profile

He primarily creates abstract paintings. At the same time, he also incorporates some expanded elements into his work. He hopes that he could become a free and unrestricted medium that connects everything through his art practice. He always explores the fundamental elements of painting—movement, depth, and light in his works. Recently, he's been adding the sense of time into his work, with materials flowing due to gravity. He hopes that his art will help people see the deeper meaning of "seeing". He has had numerous exhibitions, including solo shows, group exhibitions, art fairs, collaborations, and events.

Born in Nagano Prefecture, raised in Osaka, based in Osaka.

Graduated from the Department of Painting, Faculty of Fine Arts, Kyoto City University of Arts.
